

## Building big ideas with little magnets

Little builders explored creativity by connecting magnetic sticks to form colorful structures and shapes. This hands-on activity strengthened fine motor skills, spatial awareness, problem-solving and teamwork while learning through play.

# Dot- by- Dot Learning to Count

Children joyfully counted the dots and wrote the correct numbers from 1 to 20, strengthening their number sense. This activity enhanced counting skills, number recognition, hand-eye coordination and early writing readiness through fun practice.

# Where dots, lines and culture come alive!

Children explored traditional Warli art by creating simple human figures and patterns using basic shapes. This activity nurtured creativity, cultural awareness, fine motor skills, and expression through art.
