

Creative Shell Aquarium

Who knew pistachio shells could swim in our aquarium? Our little artists turned pistachio shells into cute, colorful fish! It was amazing to see how imagination and fun came together to create such a beautiful underwater world!

Our Sr.Kg children enthusiastically created a beautiful fish aquarium using pistachio shells. They carefully painted and arranged the shells to resemble colorful fish, showing great creativity and imagination. Through this activity, children enjoyed exploring art using recycled materials and developed their fine motor skills. The classroom was filled with excitement as they proudly displayed their unique underwater creations. **Smiles, colours, and fish everywhere—what a fun day!**

Mission Shape Hunt

Messy play, happy day, shapes found along the way!

Our tiny nursery children had a wonderful time exploring shapes in a fun rice tray activity! With little fingers and curious minds, they happily searched for hidden shapes in the soft rice. Each discovery brought excitement and big smiles as they found circles, squares, and triangles. This playful sensory activity made learning shapes enjoyable while enhancing their touch, focus, and observation skills. It was a delightful mix of fun, learning, and hands-on exploration!

Magic Tape Rainbow Art

Little artists created big rainbow surprises!

The Jr. KG children enthusiastically participated in a tape resist painting activity using vibrant rainbow colours. They carefully placed tape on paper and explored painting with bright shades, eagerly waiting to reveal the hidden patterns. As they peeled off the tape, they were amazed to see beautiful designs appear like magic. This creative activity helped children understand colour concepts, encouraged artistic expression, and enhanced their fine motor skills and patience. It was a joyful learning experience filled with creativity, curiosity, and colourful fun!
